

Solar Floating Level Sensor & Bluetooth Gateway - Nanosatellite

Monitor multiple sensors from the deepest location in your storage from anywhere in the world

theyabby.com.au

Overview

Nanosatellite with Bluetooth gateway

Low-cost, two-way global satellite connectivity for sensors. The Bluetooth gateway also allows connectivity with our level, rainfall and pressure long range Bluetooth Beacons.

Extra inputs and outputs to add levels, pressure, rain gauge, temperature, humidity, etc and switched pump control. Add-on modules can provide a suite of additional capabilities

Bluetooth and WiFi versions available. Combine this Bluetooth Gateway unit with our long range Bluetooth beacons (levels, rainfall, pressure etc) to potentially add hundreds of additional sensors

Largest low cost data plans available - 144kB to 576kB/month

Waterproof and ultra-rugged IP67 housing with industrial grade float

Urethane coated, scratch and UV resistant (10+ year life) solar panel and 30 Whr battery (3x 18650 cells)

Onboard GPS (lat/lon/alt)
